

Inside the Basel Area's Healthtech Ecosystem

# Designing the future of health

The Basel Area sits directly at the intersection of digital technology and biopharma innovation, making it Europe's fast-growing healthtech hub.

Explore how the region's concentrated ecosystem of advanced research, emerging technology and collaboration enables scale, efficiency and breakthrough science for global healthtech and techbio companies.

**Basel Area**

**800+**  
Life sciences companies

Market access

## Elevate your ecosystem

Where global giants and dynamic innovators work side by side

Collaborate with global pharma giants

80+ top healthtech companies

Advanced technology

## Be the future

The forefront of advanced technology that links institutions, industry and innovation

14 universities and research institutes – leaders in drug discovery, biomedical engineering and synthetic biology

HQs of top quantum, machine learning and AI organizations, alongside dedicated incubators and accelerators

**1,000+**  
Research groups

Collaborative culture

## Fuel your innovation

A thriving startup scene supported by top-tier infrastructure, incubators and global partnering events

1st in Europe in deep tech innovation per capital. Access leading Swiss incubators, accelerators and VCs

10+ annual healthtech-specific conferences and events

**33,000+**  
Life sciences experts

Talent options

## Build your team

The largest life sciences talent pool in mainland Europe

33K+ life sciences professionals with expertise across R&D, commercial operations and clinical trial management all in one place

Switzerland's largest commercial life sciences talent pool

**170,000**

170K students at institutions focused on medical research, data science and technology
